

IQUILA IN FINANCIAL SERVICES (INSURANCE)

OUR CHALLENGE

As a large UK insurance company, we needed a hosted remote access solution for our employees. All data is stored offsite at a data centre, and we do not maintain any onsite servers, therefore a hosted and secure solution was essential.

KEY CHALLENGES

Simple remote connectivity

Always-on connection

Robust security

Cost efficiency

THE SOLUTION

We selected iQuila Cloud for our remote access solution. The client software was easy to deploy to hundreds of users, and the always-on connectivity allows remote devices to be part of the corporate network. This integration supports full Active Directory login with complete Group Policy (GPO) management, which is crucial for our organization as it enables our central IT team to maintain full control and management of all devices. Additionally, the iQuila Cloud secure gateway ensures that internet access for all devices is secured, with all data destined for the internet being routed through the secure gateway.

KEY BENEFITS

Simple remote connectivity

The ease of deploying the iQuila client software across our user base ensured a seamless transition to remote work. Employees can connect to the corporate network effortlessly, enhancing productivity and minimizing technical issues.

Always-on connection

The always-on connectivity feature allows remote devices to always stay connected to the corporate network. This constant connection ensures that employees have uninterrupted access to necessary resources and applications, maintaining operational efficiency.

Robust security

iQuila Cloud provides a secure gateway that protects all internet-bound data. This ensures that sensitive information remains secure, and the centralised management allows our IT team to enforce security policies effectively, safeguarding our data against potential threats.

Cost efficiency

The cost-effective nature of the iQuila solution allowed us to implement a high-performance remote access infrastructure without significant financial strain. By optimizing remote connectivity and security, we reduced potential losses from downtime and security breaches, ensuring smooth and efficient operations.

SUMMARY

iQuila Cloud provided a comprehensive, secure, and efficient remote access solution tailored to the needs of our insurance company. It addressed our critical challenges of simple connectivity, always-on access, robust security, and cost efficiency, enabling us to maintain control over our remote workforce and ensure the security of our data. This solution has been instrumental in supporting our operations and maintaining our commitment to delivering reliable insurance services.
